SUMMARY

CS student at UCP (graduating 2027) with 20+ personal projects on GitHub spanning full-stack web development, REST APIs, and ML integration. Seeking a junior developer or internship role.

SKILLS

Languages: C, C++, JavaScript (ES6+), TypeScript, Python

Frontend: HTML, CSS, React, Tailwind CSS, Bootstrap

Backend: Node.js, Express

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: Docker, Linux Command Line

Version Control: Git, GitHub

English Proficiency: IELTS 7.5 bands

PROJECTS & EXPERIENCE

Inventory App (Library Management System) — Personal Project

Oct 2025 – Nov 2025

- Developed a server-side rendered application with a manuscript-style UI, implementing full CRUD functionality for four entities and an analytics dashboard.
- Transitioned the database from MySQL to PostgreSQL, updating PL/pgSQL functions and ensuring automated initialization during deployment.
- Used a strict MVC architecture to separate the SQL query layer and controllers from views, maintaining clean decoupling of business logic.

Clean Water Index (AI/ML Network Monitor) — University Project

May 2026 – Jun 2026

- Built a FastAPI backend hosting an MLPClassifier trained on 3,276 samples to provide real-time potability scores to a React interface.
- Integrated A* search over a weighted directed graph in PostgreSQL to determine optimal routes between network nodes.
- Managed sensor data and network maps using NeonDB, exposing RESTful endpoints for pathfinding and automated tank assessment.

BlogAPI (Full-Stack Blogging Platform) — Personal Project

Jan 2026 – Feb 2026

- Developed a decoupled blogging platform using React and Express with JWT authentication and a 15-endpoint REST API featuring RBAC.
- Designed a five-entity relational schema with Prisma ORM, handling many-to-many relationships and slug-based navigation for enhanced routing.
- Organized frontend logic into a dedicated service layer to keep components stateless; deployed across Vercel and Render.

EDUCATION

University of Central Punjab

Lahore, Punjab

BS in Computer Science (BSCS)

Expected Graduation: 2027

Organizations / Awards: IEEE Techathon 2025 Certificate
