SUMMARY

Proactive Computer Science student with proven skills in full-stack development, seeking an internship. Experienced in using modern tech stacks including React, Node.js, Express, PostgreSQL, and Docker to build, test, and deploy complete web applications.

SKILLS

Languages: C, C++, JavaScript (ES6+), TypeScript, Python

Frontend: HTML, CSS, React, Tailwind CSS, Bootstrap

Backend: Node.js, Express

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: Docker, Linux Command Line

Version Control: Git, GitHub

English Proficiency: 7.5 bands in IELTS

PROJECTS & EXPERIENCE

Inventory App (Library Management System) - Personal Project

Oct 2025 – Nov 2025

- Developed a full-stack Node.js/Express system, strictly adhering to MVC architecture to enforce a clear separation of concerns.
- Engineered a comprehensive database migration from MySQL to PostgreSQL, successfully adapting procedural logic, ENUM types, and schema definitions.
- Built a server-side rendered UI (EJS, TailwindCSS) featuring full CRUD capabilities and a dynamic analytics dashboard.

BlogAPI (Full-Stack Blogging Platform) - Personal Project

Jan 2026 – Feb 2026

- Developed a full-stack React/Node.js application, utilizing Prisma ORM and PostgreSQL for optimized database management and querying.
- Built a secure JWT/bcrypt authentication system and implemented Role-Based Access Control (RBAC) for multi-tiered user permissions.
- Architected the Vite frontend via a dedicated Service Layer Pattern to abstract API requests, keeping components modular and clean.

Clean Water Index (AI/ML Network Monitor) - Personal Project

May 2026 – June 2026

- Engineered a fully decoupled FastAPI backend to simulate a public water monitoring network, serving real-time evaluations to a React frontend.
- Trained and integrated an MLPClassifier (Neural Network) to evaluate hardware sensor data, converting model probabilities into a dynamic 0–100 safety rating.
- Implemented an A* search algorithm over a PostgreSQL database graph to calculate and map the optimal physical route to the nearest safe water node.

EDUCATION

University of Central Punjab

BS in Computer Science (BSCS)

Organizations/Awards: IEEE Techathon 2025 Certificate

Lahore, Punjab

Expected Graduation Date: 2027
